

e-BRIDGE Fleet Management System

Centralized Monitoring and Management of Toshiba MFPs

- > Instantly gather information from networked systems throughout your company
- > Monitor meter readings, machine availability, as well as toner and paper supply status
- > Define grouped devices by model, cost center, department, or location
- > View detailed device data including errors, consumables levels, status alerts, and current usage and history
- > Customize reports, covering groups of devices which can be defined as templates
- > Configure multiple MFPs at the same time (address books, templates, network configuration)

Reliable. Cost Effective. Easy To Implement.

If you use multiple Toshiba multifunction devices, Toshiba's fleet management tool rises to the challenge.

How It Works

Does your company maintain large numbers of network-compatible copying machines, multifunctional systems, or printers? If so, then the e-BRIDGE Fleet Management System is ideal for your business.

With the e-BRIDGE Fleet Management System, a server-based solution, you can instantly gather information from the networked Toshiba multifunction systems throughout your company.

From meter readings and machine availability to toner and paper supply status, receive information that saves you time and money. You'll know usage costs, machines that need attention and how much to bill back to your company's different departments.

e-BRIDGE Fleet Management System Installation

Features:

Flexible Grouping

Devices can be grouped in many ways:

- > By model
- > By user definable groups (cost center, department, etc.)
- > By location
 - Groups can be defined by the administrator
 - Location information is recognized automatically from device configuration of Toshiba MFPs
 - Devices are automatically discovered and assigned to a group

Expedient Monitoring

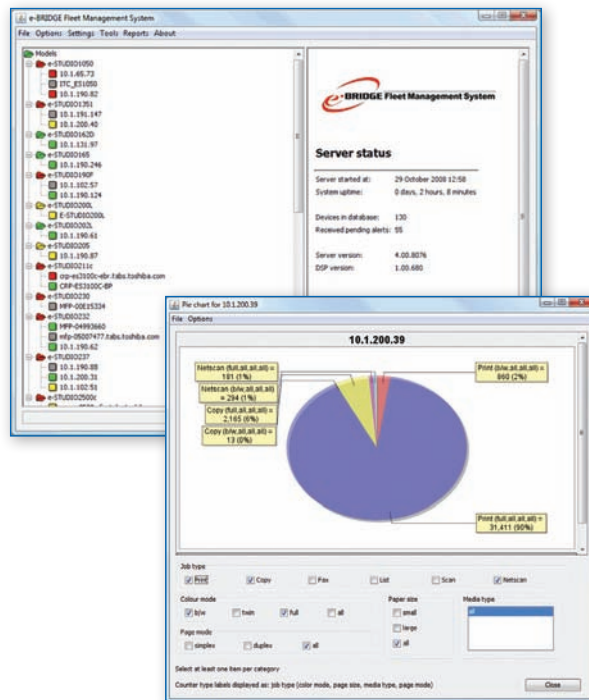

- > Retrieves detailed device data:
 - Consumables levels
 - Errors
 - Status Alerts
 - Current usage and history
- > Color coded icons easily identify device status
- > Devices can be sorted by grouping or by status, highlighting devices that need immediate attention
- > Two-tier alerting via both e-mail and pop-up differentiates issues for key-operators from issues for technical service
- > Allows for device monitoring from the administrator's desk at any time and delegates actions for care to dedicated staff

Convenient Reporting

- > Report content, covered groups of devices, and timeframe of reports can be custom defined as templates
- > Schedule and export reports with an optional cut-off date, allowing automatic periodic reporting to be implemented

Cloning Support

- > Cloning target can be any group of devices
 - Address book/ Templates
 - Network configuration
 - User database/Departments
 - The available types of cloneable data vary with the type of device model and controller
 - Cloning tasks can be scheduled

Toshiba eFMS Benefits Everyone

- > IT administrators
 - Centralized device administration and monitoring
 - Machine error notifications
- > Users
 - Improved device availability
- > Key operators
 - 1st tier alerting to dedicated staff
 - 2nd tier alerting to service organization
- > Accounting & Management
 - Regular usage reporting
 - Cost transparency
 - Cost assignment to departments and cost centers
 - Optimized device usage
 - Automated meter reading

A Reliable, Innovative Business Solution.

- > Improve productivity
- > Reduce expenses
- > Support vital infrastructure services
